THE VOYAGE THAT SHOOK THE WORLD

薛佳悦
Angela
2017/5/9

Charles Robert Darwin

• 1809~1852

- An English naturalist, geologist and biologist

This video shows the life of Darwin and his achievements. Even though there are lots of people that disagree with his theories, he still didn't give up, and kept pursuing the truth. Darwin traveled around the world and studied really hard, in his process, he gained success and joy. His adventures are legendary....

Confidence **Curiosity** Bravery

Journey to Life

By Angela
2017.6.11

CELLS

Single cells join together
Cooperating cells
Form living things
Survived from disasters
Thrive on oxygen

Evolution

Sharks take advantage of their sharp teeth to survive...
But there are also sharks that can't make it... They lose their teeth and become strong jaws (B1 & 2)

How does Caribbean Reef Shark prey?

Hear (they can hear the movement of food 1 km away)
Smell (food and fish oil can be detected 400 meters away)
Electrical Senses (sharks rely on to pick up the trail to find the place, sharks rely on to pick up the trail)
Sight (for school, sensitive)
Touch & Taste

Just a single drop of blood in 25 million drops of water is enough to turn a shark's head

«The voyage that Shook the world»

- Darwin became the naturalist — a scientist who studies nature — on the British ship HMS Beagle.
- During his voyage, Darwin observed and collected many living and fossil specimens.

- He kept a long time of the Voyage of the Beagle.

- Charles Darwin was born in England in 1809. His father and grandfather were famous doctors there and their family were very, very rich.
- When he was 22 years old, Darwin graduated from college with a degree in theology. But he was also interested in plants and animals.

Charles Darwin

Mr. 达尔文 (Darwin)

达尔文是英国著名的生物学家

• Charles Darwin was born in England in 1809.

• Darwin became the naturalist — a scientist who studies nature — on the British ship HMS Beagle.

• When he was 22 years old, Darwin graduated from college with a degree in theology.

• During his voyage, Darwin observed and collected many living and fossil specimens.

• He made some of his most important observations on the Galapagos Islands of South America.

• Darwin left England on December 27, 1831. He returned years later.

• The plants and animals on the Galapagos Island differed from island. This is where Darwin studied birds called finches.

Charles Darwin

Charles Darwin was born in England in 1809. His family was very rich, and there are lots of famous people in Darwin's family.

His uncle is the friend of a captain, and the captain worked to have a friend that he could talk to at work. The captain met Darwin and took him to HMS Beagle. He showed wilding animals, most of them are birds.

He got married with his cousin.

At last he died in 1882.

He went to college to study to become a doctor. Because Darwin's family have lots of great doctors. But Charles thought the scene of operation is so exact, so he started to study theology in another college and graduated when he was 22.

Then he had 10 child.

DARWIN
[查尔斯·罗伯特·达尔文]

DARWINI 69A

但，在2009年生，他想了整整个自然年，而且未成。他想了整整年的时间，升海井，要办公司吗？他想了两三天，办公司，再办。

也一个，一风井之流注，能如得3款同时自己的事情。办大但办就，是自然如也，有指有在的办事。

为什么会有这样一个问题呢？

为这些理由会让人认为他们不

150 年。让我们用今天所学的知识，去迎接 21 世纪。
以史为鉴，开创未来。

我打聽在鹿港所設的刑代，卻知他州中，今年，新正還無刑代，不知何時才到？

少年→中年→老年

2009年2月12日，他去世了。

1871年~1875年在施普斯伯里私立中学就读。

1925年~1927年 在暨大医学院医学。留英加所授医学

[illegible]

1931年出版第一本精神现象学笔记。

达尔文航海路线图

CHARLES DARWIN

The voyage that shook the world

① Three years later, he visited his cousin. At that moment, he observed some crows. He noticed his bird in his library.

② Darwin's theory was termed "Evolution" which proved that the crows are similar or gradually change into other species.

③ Contemporary people at that time still believed in god and heaven, and Darwin is influenced by it too.

④ He began study mocking birds as well as the island and the warm land.

⑤ After the death of his three children, he published his book and spent all the rest of his life thinking and writing his ideas.

⑥ When he was in CHILE, he found some of the most interesting birds that the world has ever had.

⑦ When he went to Australia, as a geologist, he found some birds, but unfortunately he forgot to write down the names where the birds were found.

⑧ Although he was greatly influenced by Lyell's natural selection & Hutton's theory, he still missed the idea of natural selection. Surrounding him at that moment.

(1831-1836)

The Voyage that Shook the World

2/3/19

In his journey through the world, he found a sample but vital problem: Why do species on two adjacent islands differ?

Why is that so bewildering?

At that time, people believe in a theory called 'fixity of species'. But the evidence just doesn't fit the theory: If species are created by God and they don't change over time, why would God would create spend time and thought to create so many species that is primarily the same?

What His Theory Failed to Explain

Nonetheless, Darwin's theory of evolution failed to explain one thing: How did life begin?

Social Darwinism

There are things about how human society evolve, stating it is also defined by survival-of-the-fittest. However, there those is occurring to some Christian, this theory is obviously much to cruel and violate the Bible.

Introduction
